

Gardening

Service

- We offer weekly, biweekly, or monthly service.
- Weekly and biweekly visits fall on the same day of the week. Upcoming visits can be seen on our website's [client login page](#).
- Gardening can be added to lawn mowing visits and other landscaping work.
- Service includes:
 - Garden beds - weed and moss removal and control, re-edging.
 - Groundcovers, bushes, trees - pruning, trimming, thinning, up to 12 feet.
- Fertilizers and herbicides promote plant growth and suppress weeds. A round of pre-emergent herbicide in early spring and another in late summer can help avoid a weed infestation.
- Disposal is typically performed on-site. There is a fee for off-site disposal.
- Service frequency can be adjusted, based on needs.
- Pruning is not typically done in the peak of summer. Late winter is a good time for bush and tree pruning.

Invoicing

- Service is invoiced at an hourly rate. There is no minimum time for lawn mowing clients. There is a one-hour minimum charge for gardening-only clients.
- Invoices are emailed at the end of each month of service.
- Credit cards are kept on file on our software platform, [Jobber](#).
