

# Lawn Mowing

## Service

- We offer weekly or biweekly mowing service. One or possibly two months will include three visits.
- Visits fall on the same day of the week. Upcoming visits can be seen on our website's [client login page](#).
- Service includes string trimming (weed whacking), mowing, and blowing off hard surfaces around the house.
- Gardening work can be added to lawn mowing visits for more complete landscaping maintenance.
- Clippings can be mulched or collected. Disposal is typically performed on-site. There is a fee for off-site disposal.
- We will move smaller objects in the yard and mow around larger objects.
- We do not handle feces. It will be mowed around. If it cannot be mowed around, we will do what we can to provide standard service.
- Grass over five inches in length will incur a tall grass fee.
- Service typically starts in March and runs through late November. Service frequency can be reduced during summer.
- Grass will be cut higher than normal before summer to protect it from heat and drought.
- During summer, if the grass is dormant and visits are not canceled at least 24 hours in advance, our visit will involve string trimming where helpful and blowing out the hard surfaces. These visits will be charged at a minimum of a half hour of labor.
- At the end of the season, a final visit will involve string trimming and edging, then raking and blowing out the lawn and hard surfaces around the house.
- During winter, contact us for any gardening or projects you want done. Otherwise, we reach out in late winter to arrange the next season's lawn care.

## Invoicing

- Lawn mowing service is quoted and invoiced at a flat rate per visit.
- Invoices are emailed at the end of each month of service.
- Credit cards are kept on file on our software platform, [Jobber](#).
